

Far East Europe Ltd
威遠企業 Established 1983

Water on Top Cooking Range (all models)

IMPORTANT: Supplementary Safety Notice

Before lighting ANY burners:

- Ensure that there is water to the taps and the shower rail.
- Run water onto the cook top until it overflows before lighting the burners.
- Continuously monitor the water level whilst any burners are lit and ensure the water depth is nominally 1 cm.

WARNING!

- Do not operate any burner without water on the cook top. Failure to do so will cause the cook top to crack and leak. This will also invalidate your warranty.
